THE

ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

VOLUME LII

JULY 4 to DECEMBER 26, 1908

NEW YORK
ELECTRICAL WORLD

INDEX TO VOLUME LII

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference).

A

A. & W. Electric Sign Co., *914
Absorption dynamometer, Development of. By G. E. Quick, *945
Accidents:
——Electric. By W. J. Canada, 1123
——Electric, in England, (D.) 412
——Peculiar accident caused by survey chain. By G. C. Page, 524
Accounting systems (see New York State)
Accounts, Classification of. By C. H. B. Chapin, 146
Active deposits, Electric charge of, Investigation. By S. Russ, (D.) 44
Adding machine, Motor-driven, Burroughs, *1311
Advertising (see Central-station business)
Aging, Comparative, of electric sheet steels. By T. S. Allen, 560, 579
Agriculture, Electricity in Germany, 383. By K. Krohne, (D.) 858, 960, 1306
Air compressors, Motor-driven, for rock drills, 681
Alabama Light & Traction Association, 1279
Alaska-Yukon-Portland Exposition, 984
Alcohol, Denatured, in France, 1213
Allis-Chalmers Co., Orders taken by, 1087
Alloys:
——Heusler's magnetic alloy from non-magnetic metals. By J. G. Gray, (D.) 691
——Metallic, for electrical purposes. By W. Guertler, (D.) 306
——(See also Aluminum alloy)
Alternating-current arc:
——Rectifying effect of. By J. Sahulka, (D.) 913
——Steadiness of. By C. E. Guye and A. Bron, (D.) 690
Alternating-current diagrams, Uniformity desirable. By C. Richter, (D. R.) 460
Alternating currents:
——Development of distribution system. By H. B. Gear, 952
——High-tension, direct current from. By O. M. Corbino, (D.) *95
——Non-harmonic, 1159. By B. F. Bailey, 1179
——Permeabilities. By L. Schames, (D.) *97
——Production of small variable-frequency. By B. S. Cohen, (D.) 98
——Storage batteries in alternating-current systems. By J. L. Woodbridge, *85
——Stroboscopic measurements of alternating-current frequency with electric lamps. By A. E. Kennelly, 1380, *1393
——Underground distribution. By S. D. Sprong, (D.) 359
——Vacuum-tube model for demonstrating propagation of, in cables. By C. V. Drysdale, (D.) 1251
Alternators:
——Compounding. By R. Moses, (D.) 1079
——Copper and iron in, Proportions, 87
——Parallel operation of. By M. Dumoulin, (D.) 95; F. Lux, (D.) 147
——Parallel operation of direct-connected. By A. E. Buchenberg, 1210, 1224
——Regulations of. By J. L. Routin, (D.) 910
——Rotor-field construction for turbo-alternators, (D.) 1188
——Selection of turbo-alternators. By M. Kloss, (D.) 1189
——Testing methods. By S. P. Smith, (D.) 1247, *1304
——Tests of 6000-kw turbo-alternator, (D.) 638
——Tests of turbo-alternators, (D.) 1024
——Tests of turbo-alternators at Manchester, (D. R.) 593
Aluminum:
——Prices in Europe, (D.) 1025, 1358
——Principles of the Hall process. By J. W. Richards, (D. R.) 360
Aluminum alkaline electrolytic cell a new source of illumination, 330. By G. A. Johnstone, *343
Aluminum alloys, 105
——Change of electric conductivity in London. By E. Wilson, (D.) 860
——"Magnalium," 541
American Association of Electric Motor Manufacturers, 216, 719
American Electric Fuse Co., *1194, 1412
American Electrochemical Society, New York meeting, 986
American Institute Electrical Engineers:
——Boston branch, 939, 1385
——Convention, 4, *70
——Convention papers, 85, 130, 182, 400, 401
——Fort Wayne section, 938, 1214
——Ithaca section, 1166, 1338
——Los Angeles section, 69
——Pittsburg section, 719, 938, 1166, 1337
——Schenectady section, 938
——Seattle section, 1283
American Street & Interurban Railway Association, Convention, 782, 834, 862
American Telephone & Telegraph Co., Earnings, 168
Ammeters:
——Calibration of, 247
——Direct-current, Westinghouse, *586
——High-tension circuits, *1412
——Mercury, for large currents, (D. R.) 594
——Northrup mercury pressure, *1217
——Shunts for large currents. By K. Hoerner, (D.) 914
Ampere, Andre-Marie, Memorial to, at Ampere, N. J., 1220, *1279
Ampere, Definition of. By T. Mather and F. E. Smith, (D.) 193
Ampere-hour meter, 166. By A. Koenigswerther, (D.) *149; Schwartz and Wagmueller, (D.) *862
——Prepayment, *818
Ampere, N. J., Post office at, *642
Amperes in alternating-current circuits. By A. D. Williams, Jr., 298; H. S. Pardee, 408
Arc, Electric, between solid and liquid. By G. Athanasiadis, (D.) 860
Arc, Singing. By M. La Rosa, (D.) 459; G. W. Nasmyth, (D.) 756
Arc-lamp hanger, Insulated, *102
Arc lamps:
——British lamp development, (D.) 1249
——Carbone lamp. By D. D. Miller, *537
——Clutch, Special form of, (D.) *960
——Control of. By A. Gese, (D.) 359
——Controlling method at Berlin electricity works. By R. Mylo, (D.) 1305
——Copper-titanium electrode, Ladoff patent, 433
——Development of. By E. E. Hoadley, (D.) 1081
——Electrode, Hatfield and Lewis, for enclosed lamp, 1400
——Electrodes for search-lanterns, (D.) 1188
——Flame:
Advertising with, *1257
Ash tray for, *1361
Decuple lamp, *1090
Discussion by W. H. Jones, *259
European practice. By L. J. Auerbacher, 496
General Electric, *534
Inductance coils vs. resistor in series. By P. Hoegner, (D.) *1406
Multiple-electrode, British patent, (D.) 1249
Polar. By D. D. Miller, *537
Principles of, mechanical and illuminating features. By A. A. Wohlauer, *497
Stave lamp, *197
——Improvements in, (D. R.) 638, (D.) 910, 1022
——Installation of, in steel industrial buildings. By R. Tercroft, *28
——Inverted, for shadowless illumination, *535
——Lindsay composite electrode, 636
——Magnetite. (See Magnetite arc lamps)
——Mill-type enclosed, *415
——Monasch composite electrode, 1338
——Operation on 25-cycle circuits, 1238
——"Oriflamme" magazine open-flame lamp, (D.) *1080
——Progress in. Comparison with osram lamp. By Remane, (D.) 147
——Supports for, in Brazil, *289
——Whitney electrode, 985
Arkansas Association of Public Utility Operators, 783
Armature truck, *1143
Armatures:
——Iron losses in direct-current. By W. Kehse, (D.) 637
Armatures: (Continued.)
——Production of e.m.f. in revolving. By S. Sano, 147
——Reaction in direct-current dynamos. By R. Swyngedauw, (D.) 804
——Squirrel-cage, Determining distribution of current in. By K. H. Haga and J. A. Schouten, (D. R.) 304
——Wave winding for direct-current armatures. By G. T. Hanchett, *24
——Windings, Testing method. By P. Girault, (D. R.) 304
Association of Car Lighting Engineers, 568, 1157, 1164
Association of Iron and Steel Electrical Engineers, Convention, 7
Association of Railway Telegraph Superintendents, Convention, 11
Atlantic cable:
——Cable of 1858. By William Maver, Jr., 385
——Jubilee, 287, *335
——Silver thimble and gun-cap cells used on cable. By Brother Potamian, *688
Automatic Switch Co., 644
Automobiles:
——Electric:
Cabs in London, (D. R.) 257
Development. By A. Churchward, (D.) 97; *697
Ignition. By F. R. Babcock, (D.) 1190
——England, Field for omnibuses. By F. D. Fox, (D.) 806
——Keeping warm in cold weather with electric heating pad, 1298
——Operating expenses of auto-buses in Germany. By Otto, (D.) 1133
——Standard power rating, Proposed, 67
——Storage batteries, 1113, (D.) 1024
——Test of electric and gasoline, on Boston streets, 1054
Axle practice and design. By P. Dawson, (D. R.) 531

B

Balancers, Uses and connections of. By A. Imbery, (D.) 43
Ballast resistors for avoiding sparks at breaking a circuit. By M. Kallmann, (D.) *1357
Banding machine for armatures, *1032
Barton, E. M., Biographical sketch of, *1055
Battery:
——Edison nickel-iron. By K. Perlewitz, (D.) 1134
——Simple standard. By G. A. Hulett, (D.) *361
——(See also Storage batteries)
Battery-charging rheostat, *865
Bearings:
——Lubrication of vertical. By J. Nikonow, *1231
——"Silent" annular ball bearing, *596
Becquerel, Antoine Henri, Biographical sketch. By Brother Potamian, 486
Becquerels, Constributions of the, to science, 288
Beggs, James, & Co., *646
Belgian steel works, Electricity in, *175
Belt driving. By O. Hilderbrand, (D. R.) 1407
Bell vs. independent telephone litigation, 1160
Benjamin Electric Mfg. Co., *1085, *1143, *1258, *1310, *1412
Berrien Springs, Mich., Hydro-electric development, 1381, *1389
Berry, Skinner & Co., *814
Biddle, J. G., 1362
Bidwell swindle, 940
Birdsboro Steel Foundry & Machine Co., *48
Bit, Leonard extension, *105
Blackburn Specialty Co., *1087
Blackstone Mfg. Co., Taxation of. By A. D. Adams, 1347
Bliss, E. W., Co., *918
Blower, Electric, for hot-air furnace, *415
Blowing outfit, Westinghouse horizontal, *102
Boiler-feeding problem. By J. F. Hobart, 29
Boiler-tube cleaners, *646, *1258
Boilers:
——Calking and patching. By James Francis, 1235
——Combined fire and water-tube, Traylor, *1363
——Emergency repairs. By J. F. Hobart, 1234

*Indicates illustrated articles.

193125

Boilers: (Continued.)
——Forced draft. By W. H. Wakeman, *1006, *1232
——Smokeless forced draft, 33
——Water for. By T. A. Mighill, (D.) 1081
——Water purifier and circulator, Economy, *100
Book reviews:
——Agende De L'Electro, 1307
——American Practice of Gas-Piping and Gas-Lighting in Buildings. By W. P. Gerhard, 1410
——Annuaire Pour l'An, 1411, 1909
——Cours d' Electricité. By H. Pellat, 1084
——Cyclopedia of Civil Engineering, 1411
——Dynamo Electric Machinery. By F. B. Crocker, 362
——Electrical Contracting. By L. J. Auerbacher, 99
——Elektrische Bahnen in Nordamerika. By Dr. Wyssling, 99
——Elektrische Bogenlicht. By W. B. von Czudnochowski, 151
——Elektrischen Kohlengluhfadenlampen Ihre Herstellung und Prutung. By H. Weber, 1308
——Etat Actuel de la Science Electrique. By Devaux-Charbonnel, 1136
——Hendricks' Commercial Register of the United States, 1136
——Historical books at Electrical Show, 838
——How to Build Up Furnace Efficiency. By J. W. Hays, 1308
——How to Understand Electrical Work. By W. H. Onken and J. B. Baker, 1252
——Hydro-Electric Practice. By H. von Schon, 1136
——Mesures Electriques. By Erie Gerard, 595
——Pocket Book of Electric Lighting and Heating. By S. F. Walker, 1136
——Slide Rule. By C. N. Pickworth, 1136
——Telephone Law. By A. H. McMillan, 259
——Wireless Telegraphy and Telephony. By W. W. Massie and C. R. Vanderhill, 1411
Boston:
——Electrical growth for three years, 1168
——Food Fair, Electricity at, 782
——Gas competition, 682, 857
——Illuminating engineering department, 453, 566
——Rapid transit tunnel, New, 1052, 1280
——Street-lighting bids, 142
——Street-lighting posts, 563
——Y. M. C. A. school of electricity, 566
Boston & Eastern Electric R. R., Decision of Railroad Commission, 1161
Boston Edison Co.:
——Annual report, 610
——Directory, 630
——Equipment statistics, 937
——Increase in business, 216
——Lamp exhibit, 297
——Lamp policy, New, 1054
——Rates in Winchester, 142
——Tungsten lamp, 39, 484, 568, 1169
——Tungsten lamp prices, 1161
Bracket, Steel for line work, *1411
Brakes, Alternating-current motor, *1031
Brakes, Dynamic, in printing-press drive. By S. H. Sharpsteen, *628
Brakes, Electric, for industrial purposes. By H. A. Steen, (D.) 1356
Brakes, Railway:
——British report on tramway brakes, (D.) 1249
——Discussion at International Congress, (D.) 859, 1133
Brakes, Track:
——Freund invention, (D. R.) 859
——Maley, (D.) 1190
Branch box, Weatherproof, *151
Brazil:
——Decorative lighting in, *289
——National Exposition of 1908. By A. H. Keleher, *1391
——Power plants, *1061, *1115
Bretz, J. S., Co., *596
Brewery, Electric equipment of. By W. Hand, (D.) 805
Bridge, Northern Avenue, Boston, Electricity at, 1217
Bristol Co., *1086
British Association for the Advancement of Science, Dublin meeting. By W. H. Hale, 665
Brockton, Mass., power plant, *725
Brooklyn Edison Co.:
——Dinner to contractors, 333
——Educational work, 1167
Brownian movements. By M. Seddig, (D.) 360
Bruce-Meriam-Abbott Co., *1364
Brushes, Carbon, Classification of, *999
Buckeye Electric Co., *758
Buckeye Engine Co., *816
Budapest conference, 939
Bureau of Electrical Engineering, 1257
Business methods. (See Central-station business)

C

Cable hauling on Manhattan Bridge, *643
Cable rates between U. S. and Great Britain, 1283
Cables:
——Aluminum, for underground. By H. Teissier du Cros, (D.) 1306
——Cost of high-tension underground cables. By Henry Floy, 1297
——Lead-covered, injured by insects, Santa Barbara, Cal., 837
Cables: (Continued.)
——Localizing breaks in. By J. Rymer-Jones, D.) 460, 532
——Number of wires in a stranded cable. By J. A. Fleming, (D.) 1408
——Short-period carrying capacity. By W. A. Del Mar, 1289; Comment, 1274
——Telephone, Self-induction increased. By F. Breisig, (D.) 194
——Testing apparatus, *965
——Testing high-tension. By C. Feldmann and J. Herzog, (D.) 361
——(See also Wires and wiring)
Cadmium cell. By R. Jouaust, (D.) 532
——Reproducibility of. By P. I. Wold, (D.) 963
Calcium carbide manufacture. By W. Conrad, E. Rosenthal, (D.) 755
Candle, Proposed new international, 481
Candle-power, Determining mean spherical. By E. W. Weinbeer, (D. R.) 592
Car equipment, Selection of. By F. E. Wynne, (D. R.) 458
Car lighting:
——"Axle" lighting, Report on, 1218
——Design of, 1330
——Discussion at convention of car lighting engineers, 1157, 1164
——Electric, without emergency service, 1214
——Head-end, 1278
——Storage batteries, 1215
Car Lighting Engineers, Association of, 568
Car weights and seating capacity, (D. R.) 754
Cars:
——Gasoline, New York City, 1333
——Mail, on German trolleys. By J. Nerche, (D. R.) 1357
——Storage battery, Prussian State Railways, (D.) 961, 1133, *1216
Carbon-dioxide recorder, (D.) 692
Carlisle & Finch Co., *916
Carnegie, Andrew, Dinner to, by telegraphers, 1212
Carnegie Technical Schools, 72
Cast iron in chemical plant. By T. J. R Carulla, (D. R.) 193
Cathode and canal rays from hollow cathodes. By J. Kunz, (D. R.) 360
Cathode rays, Change of color by. By C. C. Hutchins, (D.) 640
Cazadero power plant, Destruction of, *72
Central Electric Co., *103, *151, *365, *866
Central Electrical Co., *1412
Central Laboratory Supply Co., *757
Central-station business:
——Advertising:
Boston illuminating engineering department, 453
Davenport, Iowa, *681
Discussion. By N. G. Meade, 1073
Rochester, N. Y., 40
Rockford, Ill., *251, *252
Springfield, Mass., 1123
——Amherst, Mass. By W. H. Stuart, *140
——Analysis of the operation of a small station. By L. P. Zimmerman, 1300
——Bulletin issued at West Ham, England, *452
——Complaints, Handling of. By S. H. Williams, 402; F. M. Reast, 1239
——Contractors' relations with the central station. By E. F. Tweedy, 91, 92; P. F. Shivers, 302; George Lewis, 454; S. J. Robinson, 749
——Corporation publicity, Advantage of. By J. L. Richards, 1349
——Cost system, Columbus, Ohio, 1299
——Costs, Analysis of, 1239
——Day circuits in small towns, 1209
——Day load for electric light stations. By James Francis, 401
——Day load, Low rates as a factor in acquiring. By T. F. Reardon, 1014
——Day service, Establishing, in a small town, Discussion, 1240
——Display and sales room, Advertising value of, 955
——"Electric conveniences," Use of phrase, 118
——Elmira, N. Y., *395
——Employees as special solicitors, Cadillac, Mich., 744
——Extending service to neighboring towns. By E. O. Brown, 1241
——Fan introduction record, Lawrenceville, Ill., 744
——Furnace-fan business, 1298
——Flat irons, 10,000, loaned for six months, Chicago, 1181, 1380, 1401
——Gas competition, Meeting. By Fred Leslie, 526
——Gasoline plant competition, 1401
——House wiring offer at Rockford, 143
——Increasing business. By F. H. Plaice, 683
——Industrial power business from a central-station viewpoint. By W. F. Lloyd, 586
——Lowell, Mass., Tungsten lamp, 526
——Marion, Ind., Non-peak load, 3, *34
——Miscellaneous service, 280
——Montreal, High efficiency lamps, 297
——Nashua, N. H. By W. H. Stuart, 183
——New business work, Sidelights on. By H. H. MacPherson, 1349
——New London, Conn. By W. H. Stuart, 15
——Non-peak contracts, Detroit, Mich., 253
——Non-peak contracts, Marion, Ind., 3, *34
——Northampton, Mass. By W. H. Stuart, 251
——Outline lighting. Soliciting for, 3
——Power engineering by central stations. By H. W. Hillman, 852
Central station business: (Continued.)
——Power load, Campaign work for. By E. L. Crosby, 451
——Private-plant competition. By B. H. Gardner, 632
——Public policies in public service. By H. H. MacPherson, 248
——Refrigeration for the ice-cream maker. By R. L. Lloyd, *1074
——Relations with the public, 40
——Rockford, Ill., 184
——St. Joseph, Mo., *252
——St. Louis, Popularizing domestic appliances, 1401
——Salem, Mass., *448
——Scranton, Pa., New methods, 36
——Show windows, Loading, 141
——Sign advertising, Value of, 744
——Sign lighting, 682
——Small consumers, 981
——Statistics, 1907-8
——"Stop-loss" illumination design. By J. R. Long, 950
——Technical vs. popular language, 526
——Tungsten lamps:
Effect of. By L. P. Sawyer, 585
Europe, Situation in. By Dr. Louis Bell, 496; L. Kemper, 687
Houghton County, Mich., policy, 950
Little Rock, Ark., experience, 950
Obligatory free renewals, 780
Ohio central stations, 630
Opinions of representative men, 506
——Vacuum cleaning load, 799
——Wiring by central station companies, 454
——Worcester, Mass., 492
Central-station chart, A handy. By W. F. Kimball, 1350
Central station practice:
——Combined steam and water power plant. By C. M. Shaw, (D.) 256; M. Arbeiter, (D. R.) 530
——Controllable non-peak load. By A. J. Farnsworth, *1138
——Design of generating stations. By H. Richardson, (D.) 256
——Distribution costs in seven stations, 1014
——Diversity factor among consumers. By F. Fernie, (D.) 459
——Double-deck, steam turbine stations, *21, (D. R.) 807
——Efficiencies of plant. By H. M. Hobart, (D.) 1158, 1188
——Exhaust-steam power plant, British, (D.) 1306
——Gas engines in stations. By W. M. Adams, 631
Fairmont, Minn., *1340
Keene, N. H., Producer gas, *1064
Newton, N. J., 430, *439
Richmond, Va., Test, 400
Small station. By F. W. Sawyer, 1336
——Labor requirements in Massachusetts, 785
——Lessons from electrical troubles, 1228
——Location of power house, Pertinent considerations on. By E. D. Dreyfus, 403
——Oil-engine plant, 517
——Oil-engine plant in Polk County, Florida, *729
——Oil fuel at Rochester, N. Y., 563
——Operating cost. By Engelmann, (D.) 806
——Operating costs in six medium-sized central stations, 1402
——Operation of hydro-electric and steam plants in parallel, 664
——Operation without attendant, Hartland, Vt. By M. A. Hicks, *515, 1022
——Refuse destruction for generation of energy. By B. Heine, (D.) 1024
——Storage batteries for peak loads. By A. M. Taylor, (D.) 257
——Testing department. By H. A. Ratcliff, (D.) 258
——Twenty-five-volt lighting circuits, (D.) 959
——Uneconomical loads; cotton mill loads in the South, 1051. By A. D. Adams, 1070
Central stations:
——American, Characteristics of, 1214
——Arbroath, Scotland, (D. R.) 639
——Austria, on Kerka River. By H. Tenzer, (D.) *1023
——Austria, Statistics, (D.) 1190
——Beatrice, Neb., *1124
——Berrien Springs, Mich., 1381, *1389
——Birmingham, England, Statistics, (D.) 97
——Brazil, on the Piabanha River, Hydro-electric plant, *1061
——Brazil, in State of Minas Geraes, Cataguazes Light & Power Co., *1115
——Brockton, Mass., *725
——Caracas, Venezuela, *941
——Coeymans, N. Y., *700
——Columbus, Ohio, Cost system, 1299
——Cornwall plant disapproved, 1382
——Dan River Power & Mfg. Co., Virginia. By N. H. Slaughter, *671
——Durban, South Africa, (D.) 639
——Eastern Pennsylvania Railways Co., Stations of, *891
——Ellsworth, Maine, hydro-electric plant, 1163
——Fort Wayne, Ind., *1221
——France:
Brillane-Villeneuve. By A. Solier, (D.) 410
Tille district, (D.) 690
Marseilles, (D.) 1407
Mediterranean coast, (D.) 690
Statistics, (D.) 961
Various stations, (D.) 1132
Wasquehal plant, (D.) 1249.

*Indicates illustrated articles.

Central stations: (Continued.)
——Frankfort, Germany, Statistics, (D.) 1358
——Great Britain:
Annual report, (D.) 192
Statistics of England. By G. L. Addenbroke, (D.) 1081
——Fairmont, Minn., Producer gas plant, *1340
——Greenfield, Mass. By I. M. Cushing, (D.) 754
——Hartford, Conn., Various plants, *1175
——Hartland, Vt., Hydro-electric station operating without attendant. By M. A. Hicks, 515, 1022
——India, at Cawnpore, (D.) 1189
——Italy, Hydro-electric station at Caffaro, *127
——Italy, Upper, in coal district. By L. Pasching, (D.) 592
——Japan. By M. Kawara, *897
——Keene, N. H. Producer gas-engine plant, *1064
——London, St. Marylebone, *617
——London statistics, (D.) 192
——Lowell, Mass., Improvements, 1055
——Manchester, England, Report, (D.) 411
——Mass., Labor requirements, 785
——Munich, Germany, (D.) 593, *1171
——New stations in 1908, 482
——New York City, Investigation by Public Service Commission, 1276, 1332
——Norway, at Svälgfossen, (D.) 638
——Poughkeepsie, N. Y., *489
——Prescott, Ariz., hydro-electric plant, 382
——Redondo, Cal., *569
——St. Clair tunnel, *1056

Illumination. (See Lighting.)
Illumination inspection. By A. J. Marshall, 588
Incandescent lamps:
——Candle-power and voltage of different types of lamps, 790
——Decorative lamps, *315
——Filament dimensions for carbon and osram lamps. By H. Remane, 96
——Gem, with oval filaments, National Electric Lamp Association, *310
——Hand-lamps, (D.) *413
——Helion. By H. C. Parker and W. G. Clark, 501
——Leading-in wires, Whitney patent, 989
——Metallic filament:
Auto-transformers for. By J. L. Cateaux, (D.) 1080
British patents, (D.) 530, 1248, 1305
Elastic suspension, Druseidt patent, *433
Excessive voltage and life of lamps. By Remane, (D.) 147, 638
Life Effect of voltage variation on. By H. Remane, (D.) 689
Luminous efficiency of metal filament lamps. By W. W. Coblentz, 1345
Manufacture of, (D.) 690. By J. Swinburne, (D.) 1080
Manufacturing methods. By B. Duschnitz, (D.) 591, 1080, 1305, 1407
Nitride of cerium, Whitney patent, 437
Patents of the pioneer stage. By C. R. Bochm, (D. R.) 1305
Photometry of. By C. Paulus, (D.) 191
Progress made with. By W. Wedding, (D.) 147
Supports for filaments, British patent, (D.) 1188
Tests of large number of lamps. By W. Wedding, (D.) 458
Thowless patent, 124, 1283
Transformers for reducing voltage, (D.) 42
Wiring for 25-volt lamps. By A. H. Dykes, (D.) 1131
Wolfram-Lampen compound filament, (D.) 1356
——Nernst lamps:
Chandelier for, *1363
Efficiency. By A. L. Eustice, 301; V. R. Lansingh, J. R. Cravath, 89, 356, 857, 1129
Patent, 840
Selective radiation from glower, 379. By W. W. Coblentz, (D.) 410
Voltage variation, Effect of, on candle-power. By B. Walter, (D.) 305
Westinghouse, *413, 721
——Osram:
Comparison with incandescent gas lamps. By J. D. Mackenzie, (D.) 191
German 250-volt, (D. R.) 147
Osram and osmium lamps, 1238
Price reduction in England, (D.) 1305
Superior to arc lamps. By Remane, (D.) 147
Vs. small arc lamps. By H. Remane, (D.) 592, 638
——Progress in, (D.) 359
——Rare earth filaments, British patent, (D.) 960
——Standard lamp of the future. By H. Remane, (D.) 95
——Tantalum:
General Electric, 99
Life and use of. By F. W. Willcox, (D.) 42
——Temperature fluctuation in alternating-current lamps. By H. Ebeling, (D.) 1356
Incandescent lamps: (Continued.)
——Tungsten:
Bloxam filament patent, (D.) 1248
British patent of Allg. Elek. Ges., (D.) 359
British Thomson-Houston Co., (D.) 358
Cleaning lamps and reflectors, 7
Condenser effect. By L. C. White, 1236
Flexible suspension, 1019
Fraud patent case, 1212, 1382
General Electric, 99
German manufacturing patent, 938
Holophane clusters with tungsten lamps, *534
Improvements in lamp, 982
Invention by Bottome. By J. A. Yunck, (D. R.) 1305
Just lamps, German tests, 2; (D.) *41, *542
Kuzel patent, 382, 562, 660
Kuzel 25-watt, *260
Life, breakage, candle-power. By F. W. Willcox, *502
Lightning test of, *1076
Manufacture and life of. By E. F. Tweedy, 37
"Meridian" lamps, *310, 721
Miniature and low-voltage, *758
Overshooting, and other phenomena. By J. S. Freeman, *334, 380
Philips, 542
"Sunbeam," 949
25-watt lamp, 166
Westinghouse low-voltage, Applications for, *538
——Tungsten-thorium filament, British, (D.) 910
Indiana Electric Light Association, 1213
Indiana Municipal League, 69
Indiana Steel Co., Gary, Ind., Electrical equipment, *693, 1078
Indicator reducing motion, Ball, *51
Inductance. By J. W. Nicholson, (D. R.) 258
——Measurement of large ferric inductances with feeble currents, 832
——Mutual and self-induction. By E. B. Rosa and L. Cohen, (D.) 692
Induction, Electromagnetic, Law of. By Carl Hering and others, 286
Induction, Law of. By F. Emde, (D.) 1307, 1358
Induction, Variable standard of self-induction, Mainbridge, *1362
Induction coil, Alternating current in secondary coil, 525
Induction from transmission line, Oregon, (D.) 756
Inductors of large inductance containing iron, Measurement of. By Oliver Lodge and B. Davies, (D.) 808
Industrial plants, Electricity in:
——Alternating-current motors and lamps. By W. H. Miller, 16
——Aluminum plant in North Wales, (D.) 1249
——American Thread Co., *964
——Belgian steel works, *175
——Brass and copper rolling mills. By C. A. Ablett, (D.) 1249
——Brewery, Electricity in. By W. Hand, (D.) 805
——Distribution systems, Electrical. By W. H. Miller, 1001
——Gas-engine power plant of Union Switch & Signal Co., *1287
——Great Southern Lumber Co., Bogalusa, La., *262
——Ilgner driving system, 567
——Indiana Steel Co., Gary, Ind., *693, 1078
——Isolated power plant costs and their relation to central station service. By W. F. Lloyd, 1182
——Lead plant of Raymond Lead Co., *1030
——Old machine shop equipped with motors. By John Rogers, 739
——Piano factory, Connersville, Ind., *1026
——Rolling mill driving. By C. Koettgen and C. A. Ablett, (D.) 1023; (D.) 1024
——Rolling mill plant. Electric motor coupled with gas engine. By F. Collischonn, (D.) 1356
——Saw mill refuse vs. electric power, 744
——Shipbuilding plant in England, (D.) 359
——Spinning mill in England, (D.) 860
——Statistics, electric motors vs. steam engines in factories. By R. E. Barker, (D.) 911
——Steam turbines at Nashua, N. H., *701
——Steel works of Oehler & Co., (D.) 1026
Industrial revival, 1049
Inspection, Electrical, from viewpoint of central station. By W. H. Blood, Jr., 932, 935
Institution of Electrical Engineers, New building for, *562
Instruments:
——Alternating currents of low intensity, Instruments for. By L. Pillier, (D.) *306
——Combined indicating and recording, *757
——Correcting readings of, 247
——French exposition. By J. Reyval, (D.) 150
——Moving-coil instruments. By O. Herain, (D.) 307; A. Schortau, (D.) *1191
——(See also their names)
Insulating coupling, Ashbaugh patent, *587
Insulating shields for protecting linemen, *1142
Insulation:
——Effect of oil on dielectric strength of insulating cloths, papers and varnishes, Investigation at Worcester Polytechnic Institute, 132
——Enamel insulation, 194
——Fatigue of insulation, 933. By A. S. Langsdorf, *942
——Incompatibility of liquid insulating materials, 968
Insulation: (Continued.)
——Insulating and sheathing high-tension underground cables. By Henry Floy, 732
——"Micanneal," *1412
——"Minerallac" on cable joints in high-tension lines, *544
——Perforation voltage and temperature. By A. Grau, (D.) 361
——Rubber insulation. Preparation of material, 181
——Varnishes, Insulating properties of. By A. B. Weeks, 1236
Insulation resistance and other tests in completed electrical installations. By H. T. Weeks, 299; Max Freimark, 408
Insulator fixtures, Home-made. By G. R. Voit, *750
Insulators:
——Flexible suspension, *48
——Insulators in a magnetic field. By S. J. Barnett, (D. R.) 1252
——New Lexington high-tension, *536
——Nikonow high-tension, *1280
——Pot-head insulator, (D.) *1135
——Testing of high-voltage, Proposed specifications, 178
